

## Cleanstream Textile System Advantages / System Comparisons

Ultra low power usage

Costs 7cents per day for treatment process

Advanced Sewage System - Not just a secondary system

Durable robust system less sensitive to household fluctuations.

Can deal with "shock loading" e.g Lots of visitors arriving for holidays or frequent large washing loads.

Can deal with long periods of no occupation.

Suitable for holiday home applications.

Advanced treatment results in high quality effluent which prevents blockage of arkal filters.

Optimum performing arkal filters reduces the load on the pump = lower power costs and savings .

No air blowers running 24 hours per day / 365 days / year

Power costs and savings through no air blower unit.

1 Annual service @\$180.00 + GST  
Instead of 2 traditional services per year @ \$200 + GST each = more savings.

Adds re sale value to homes.

Low running and maintenance costs are desirable for prospective house buyers.
