

# New Development

34 Rustybrook Road, Wellsford

BEFORE

## DEMAND / OPPORTUNITY

The Rodney and North Auckland region is a growth area with many opportunities.

The demand for Duracrete products has been consistent over the past decade.

We listened to our customers and have decided to open another branch at Wellsford.

We are now able to supply the construction sector with quality Duracrete tanks from two facilities, Whangarei and Wellsford.

This provides improved service levels and increased capacity to our customers in these areas.

## NEW DEVELOPMENT, WELLSFORD

The new Duracrete factory is located at 34 Rustybrook Road, Wellsford. (The building was formerly Ravensdown Fertiliser).

We have redeveloped and upgraded the premises to a modern precast concrete manufacturing facility.

We produce our concrete using our new Elkon batching plant which ensures quality control from start to finish.

Duracrete tanks, CleanStream TXR and Redi-Rock Walls are manufactured at Wellsford.

## COMMUNITY SUPPORT

We are pleased to bring employment opportunities to Wellsford and support local businesses.

We have employed three local workers to date, and we support local businesses and suppliers in the area.
